DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/15/10 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claim 6 is rejected under 35 U.S.C. 102(a) as being anticipated by Applicants' Admitted Prior Art (AAPA). *See page 1, line 19 – page 3, line 18 for further clarification.*

Regarding claim 6, AAPA discloses at page 1, line 19 – page 3, line 18, detecting a position of a wheel tilting angle adjustment member (i.e. a tie rod; pg. 1, lines 22-24), wherein a position of a wheel mounted on a vehicle is detected through the wheel tilting angle adjustment member which adjusts a tilting angle of the wheel because the operator can use a tie rod adjustment apparatus in combination with the tilting angle adjustment member to detect a position of the wheel, and the position of the wheel tilting angle adjustment member (i.e. tie rod) is calculated on the basis of the

detected wheel position and relative position information of the wheel tilting angle adjustment member with respect to the wheel by the operator because the operator may or may not have to adjust the wheel tilting angle for each respective wheel. It is known to set the relative position information for each vehicle type.

Note that the recitation "without visual observation by the operator" has not been given patentable weight has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hiraio*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

Allowable Subject Matter

4. Claims 1-5 are allowed.

Response to Arguments

5. Applicant's arguments filed 7/15/10 have been fully considered but they are not persuasive.

Applicants argue that the present amendment to Claim 6 overcomes the rejection because the AIPA does not teach or anticipate "[a] method for detecting a position of a wheel tilting angle adjustment member *without visual observation by the operator*,".

In response, the Examiner states the above highlighted recitation has not been given patentable weight because the recitation occurs in the preamble. A preamble is

generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

Conclusion

6. This is a RCE of applicant's earlier Application No. 10/517,315. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
